

### LINDA

Seamless linear extrusion lenses with excellent optical control and innovative installation.

LINDA is an industry first linear extrusion lens family with precise light control. The optics are made of diffused PMMA for high optical efficiency with good LED source hiding power and exceptional colour-over-angle performance for an extrusion. They are easy to install by either pressing or sliding the lens into the luminaire housing and are offered in popular beam patterns. LINDA can be customized for luminaires for different lengths and is compatible with single row mid-power PCBs.
