

Oxytech 4D IES rotate

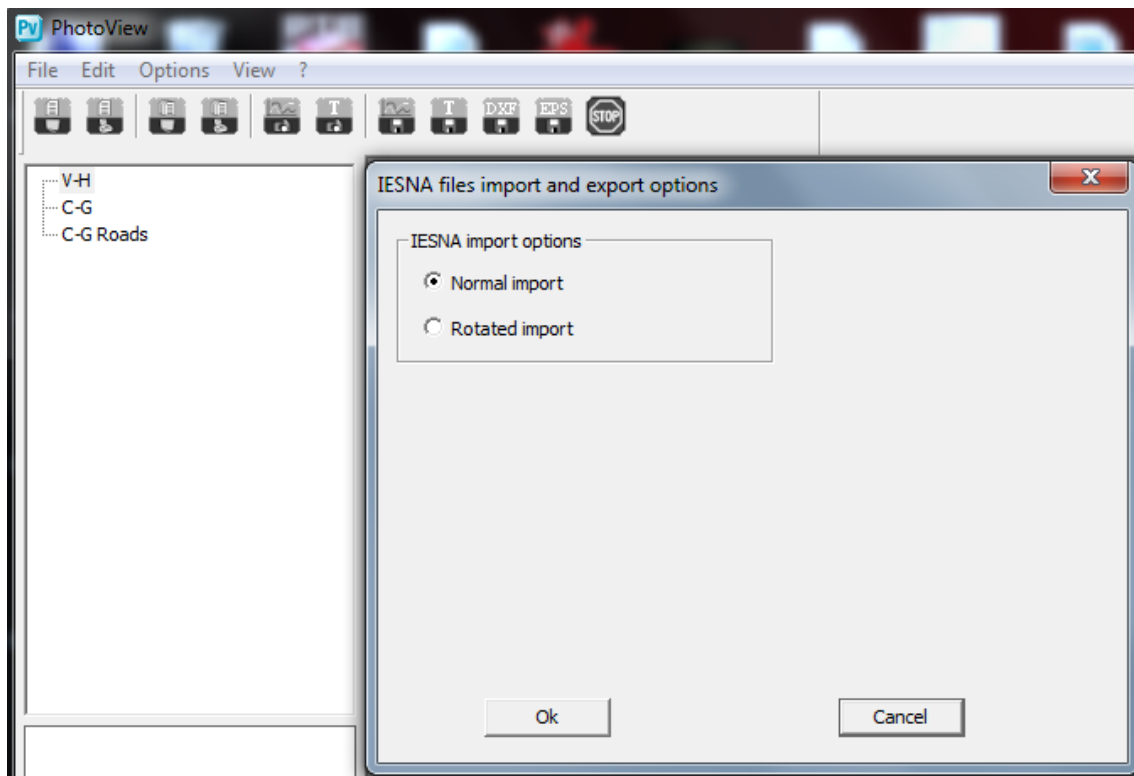

1. Download and setup freeware LIFESTAR 4D open.
2. Start Photoview (See picture).

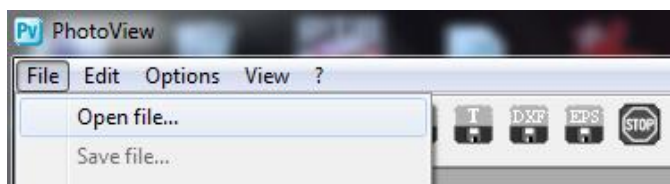

3. Open the IES file.

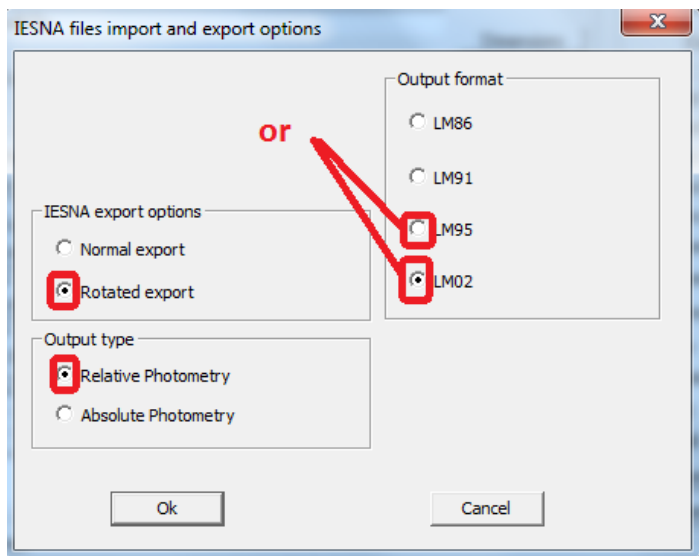

4. Choose normal import.

5. Save the file with different name (For example add _rotated). Also you can change format to ldt.

6. Next choose these.

7. Check that IESNA file is right way up with example visual-3d (<http://www.visual-3d.com/Tools/PhotometricViewer>).
